

Village of Springville Electric Customers

This is to let all Village of Springville Electric customers know that March's upcoming electric bills will be much higher than normal. The extreme weather that affected the entire state and eastern states the last week of January 2026 has caused the demand for electricity to skyrocket. Demand sharply increased and the supply throughout the state was not sufficient for that demand. This caused the pricing to increase drastically. These unfortunately are passed through cost to all customers. The Village of Springville is a member of NYMPA (New York Municipal Power Agency and (MEUA) the Municipal Electric Utility Association) this helps us keep the costs as low as possible. The costs to customers of Public Utilities are much higher. Thank you for your understanding.
